

SHANGHAI HIGH-TECH ENTERPRISE
THE LEADER TO SUPPLY THE MATERIAL OF PVC CARD

PVC CARD SHEET SERIES

INKJET PRINTING SHEET

Our inkjet printing sheet is based on high-class PVC raw material, coated with laminating glue on the back, make the card-making process faster and easier; with our excellent printable coating on the surface, the printed image of the sheet is clear, the edge is sharp and the color performance is excellent; after printed, the ink will dry fast and the fastness is good after laminated; widely used for making staff card, student card, credit card and so on.

[Printer] Various of inkjet printers such as EPSON, HP, CANON etc.
[Color] White, Milky white, Gold, Silver, Light silver, Transparent.
[Thickness] 150mic, 170mic, 180mic, 300mic, 330mic and customized.
[Laminating Temp.] 110 DC ~ 140 DC According to the Laminator.
[Storage] carry lightly, room temperature, stack height less than 1 meter.
[Validity] 18 months.
[Specifications] A4, A3 or customized.

WATER-PROOF INKJET PRINTING SHEET

Our water-proof inkjet printing sheet is based on high-class PVC raw material, coated with laminating glue on the back, make the card-making process faster and easier; the printable coating on the surface is high glossy and waterproof, the printed image is clear, friendly with ink. The sheets widely being made into small blank card and then inkjet printing, high flexible and convenient, finished card image quality better than photopaper.

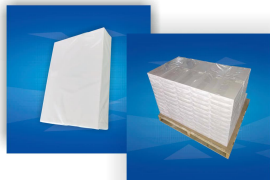

[Printer] Various of inkjet printers such as EPSON, HP, CANON etc.
[Color] White.
[Thickness] 200mic or customized.
[Laminating Temp.] 110 DC ~ 140 DC According to the Laminator.
[Storage] carry lightly, room temperature, stack height less than 1 meter.
[Validity] 18 months.
[Specifications] A4 or customized.

HIGH-CLASS PVC CORE SHEET/ PVC OFFSET PRINTING SHEET

The PVC core sheet main component is poly(vinyl chloride) material, mainly used for the basic material of printing PVC laminating cards, silk screen cards, offset printing cards and so on. Vicat heat-resistant is 77°C. Applicable to make VIP cards, membership cards, debit cards, magnetic stripe cards, bar code cards, IC cards, ID cards, gold cards, silver cards, prints, etc. Good printing effect, high lamination performance, uniform thickness and other characteristics.

[Color] White.
[Thickness] 200mic, 300mic, 400mic, 500mic, 600mic or customized.
[Laminating Temp.] 110 DC ~ 140 DC According to the Laminator.
[Storage] carry lightly, room temperature, stack height less than 1 meter.
[Validity] 18 months.
[Specifications] A4, A3 or customized.

SHANGHAI HIGH-TECH ENTERPRISE
THE LEADER TO SUPPLY THE MATERIAL OF PVC CARD

PVC CARD SHEET SERIES

LASER DIGITAL PRINTING SHEETS

Laser digital printing sheets is based on high-class PVC raw material, coated with laminating glue on the back, make the card-making process faster and easier. The printable coating of laser printable sheet with excellent properties and special structures, once printed, the toner and coating will be tightly combined, so that the printed image is stable, the finished cards is long storage life, widely used for making staff card, student card, credit card and so on.

[Printer] compatible for KONICA MENOLTA, RICOH, FUJI XEROX, XEROX, MGI ETC.
[Color] White, Light silver.
[Thickness] 210mic or customized.
[Laminating Temp.] 110 DC ~ 130 DC According to the Laminator.
[Storage] carry lightly, room temperature, stack height less than 1 meter.
[Validity] 18 months.
[Specifications] 305x464mm or customized.
[Validity] 18 months.

HP INDIGO DIGITAL PRINTING PVC SHEET

Based on high class PVC raw material, the printable coating with Excellent Performance and Special Structure, making the printed image colorful, reality, sharpness, widely being used for the high quality cards with Landscape, portrait and text.

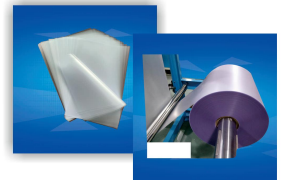

[Printer] HP indigo Digital printer.
[Color] White, Milky white, Gold, Light silver.
[Thickness] 170mic, 300mic or customized.
[Laminating Temp.] 110 DC ~ 140 DC According to the Laminator.
[Storage] carry lightly, room temperature, stack height less than 1 meter.
[Validity] 18 months.
[Specifications] 305x464mm, 320x464mm or customized.

HIGH CLASS PVC COATED OVERLAY

Being coated with water-based eco-friendly glue, our high class pvc coated overlay has excellent. Adhesion with PVC printing card sheet and pvc core, the laminated cards with our coated overlay are more glossy and has the characteristics of waterproof, scratch-proof and long storage time the coated overlay is coated with glue only one side, choose the right glue side as the label shows when laminating, our coated overlay is suit for making process of laminated cards, can be laminated directly with printed sheets, it helps to make the process easier, save time for whole process and have strong adhesive power. Type 500 overlay suit for normal UV ink and inkjet printed surface while Type 600 overlay suit for HP indigo and toner printed surface.

[Color] Transparent.
[Thickness] 10mic, 60mic, 80mic, 100mic or customized.
[Vicat] 72°C, 89°C (uncoated raw material).
[Laminating Temp.] 110 DC ~ 140 DC According to the Laminator.
[Storage] carry lightly, room temperature, stack height less than 1 meter.
[Validity] 18 months.
[Specifications] A4, A3, 305x464mm or customized.
